Manufactured by

Ergonomic Design

Scrubbing Centre is not an automatic system, so it needs to be operated by people. Therefore, it should be based on a harmonious relationship between people and the system.

Light Source

Endoscope is high-precision device with lumen. To help on washing, light source of the system is designed as facilitating light source providing extra lumination for the room which is lack of light, and in the meantime ease visual exhaustion of working staff.

Material

Sinks are made of composite material which is very comfortable when touching, even in winter, you will not feel cold.

Specification

Height of the equipment and width of the sinks are ergonomic designed and good for operating.

Colour

White, the neutral colour, is the background colour of CSSD. Comparing with the colour of stainless steel and plastic, white colour is pressure-free and relaxing.

Auxiliary Instrument

- Data collecting terminal does not require manual input, saving time for operators.
- Gas filtration device to reduce pollution of the indoor environment.
- Disinfectant retrieving box to evaporation of chemicals and lower the concentration of solutions.
- Automatic liquid injection device to ensure the safety of operators and reduce their workload.
